

## LARGO 70

### Bookshelf, satellite HiFi speaker

We can say about this new line of speakers, called Largo, that it moves the bar for design and audio performance in its price category. More than the annual development is really striking and the result can be compared to much more expensive competitors.

#### Appearance

Its appearance is practical and luxurious at the same time. Top and front wall is matt black, coated with a special foil imitated leather. Side and rear wall is dark brown, with a hint of cherry wood color. Thus, we have chosen black-brown combination, it is easier to fit it with your furniture. If you need black speakers, we assume move it more besides furniture. Conversely, if you like the wood pattern you recommend slightly pull up it outside furniture. You'll like rounded edges, witch we made in order to minimize the resulting diffraction effects. Another design feature is the sloping front wall to reduce phase shifts towards tweeter section. Each package includes a removable front frame with black cloth grille.

#### Construction

The cabinet is constructed from 20mm MDF with several partitions and reinforcements. For damping, we use special acoustic material. Bass-reflex port are significantly rounded on both sides. The woofers have a polypropylene membrane with polyrubber edge with good damping results. The midrange speaker uses a special dust cup to extend frequency range. The tweeter has a textile dome. These quality speakers with a sophisticated crossover are the basis of quality construction with high quality sound. The speakers are equipped with massive screw terminals, in addition, model Largo 130 allows Bi Wiring or Bi Ampling system connection.

#### Sound

Short sentence would be enough: „You will get excited“ For the first time listening, you dig sonic balance. No thundering bass, no spicy highs, no covered mids. Expect sound quality, clarity of expression and sound that you will not get tired even after hours of listening. No important, if you connect it on the stereo or home theater. Its job done perfectly.

#### Technical datas

- 2 way	- 2 × bass-reflex port on the front side
- HiFi, bookshelf, satellite type	- Bass-reflex enclosure design
- Woofer 5.25"	- Simple connection terminal
- Dome tweeter 1"	- Dimensions 195 × 330 × 257 mm
- Power 35 / 80 W	- Weight 5.5 kg / 1 pc
- Impedance 6 Ω	- Suitable placement on the stand, furniture, wall mount
- Sensitivity 89 dB / 1W, 1m	
- Frequency range of 55-20 000 Hz;	<b>Cat. Nr.: 08 100</b> <b>pair</b>
