SC 35AH

Horn speaker

Directive reentrant (horn) speaker for public address, both indoor and outdoor sound applications by 100 V line (not only) signal network. High sensitivity and slim polar horizontal pattern are good for sounding of far and slim places, such as manufacture places, parkings, roads, pavements, warehouses, supermarkets, sport facilities, outdoor places etc. These speakers have high sensitivity, very good comprehensible sound, and high climatic resistivity, not only because of its ABS enclosure. These speakers also could be used as mobile sound devices on car roof after transformer deinstallation. Packing includes moveable installation console for easy mounting.

Rear Label

Technical datas

- power 30 W rms / 100 V
- min. input impedance 333 Ω
- eq. sensitivity 106 dB / 1W, 1m
- frequency response 200 – 11 000 Hz
- white ABS
- slim directivity response
- power steps
- steel positionable handle

- dimensions 284 × 205 × 285 mm
- weight 2 kg
- protection class IP 66
- usseable for both indor and outdoor, moist and rain resistant
- usseable for manufacture places, parkings, roads, pavements, warehouses, supermarkets, sport facilities etc.
